

## PRESS RELEASE

06 December 2017

### PGN SAKA Uses BlackBerry Security System to Secure Cyber-threats

**Jakarta, Indonesia** – PT Saka Energi Indonesia (PGN SAKA) is the upstream oil and gas company subsidiary of PT Perusahaan Gas Negara (Persero) Tbk (PGN) has become the first customer of BlackBerry® Unified Endpoint Manager (BlackBerry® UEM). BlackBerry® UEM is a software that delivers integrated endpoint management and integrated policy control for a diverse growing mobile workforce.

The oil and gas industry is a crucial player in the Indonesian economy, which means all data must be protected to ensure people safety, productivity and compliance with national regulations. The energy sector is however a very complex industry, that requires both specialist expertise and the most secure solutions to support it.

PGN SAKA is deploying BlackBerry® UEM, which secures and manages all end-points in an organization, to enable truly secure mobile working. PGN SAKA chose BlackBerry's trusted enterprise solution to increase operational efficiency and the ability for management, staff and clients to securely share information from wherever they are. BlackBerry UEM is enabling the company to increase the convenience of mobile working and make the business secure, while reducing its operational burden.

Alex Manea, Chief Security Officer of Blackberry, said "We are excited to partner with PGASCOM to combine our secure solutions with their expertise to assist PGN SAKA and other companies to realize their digital transformation goals,".

The deployment of BlackBerry UEM by PGN SAKA is a result of a new channel partnership with PT PGAS Telekomunikasi Nusantara (PGASCOM), a subsidiary of PT Perusahaan Gas Negara (Persero) Tbk (PGN). The company has joined the global BlackBerry Enterprise Partner Program (BEPP), offering telecommunications network services, including fiber optics, internet access, business solution and managed services for the Indonesian oil and gas industry. PGASCOM is the latest company to join the BEPP, offering support and systems integration services on BlackBerry Secure solutions for its clients.

Tumbuh Parlindungan, President Director of PGN SAKA said "As part of our digital transformation strategy, we need to mobilize our workforce and drive satisfaction as well as efficiencies in our business, with the peace of mind that are protecting sensitive business information and keeping our people safe. We chose BlackBerry UEM and PGASCOM because together, they can provide information confidentiality at every level, with the integration support and expertise that truly understands the complexity of our business.".

---

**PT Saka Energi Indonesia (PGN SAKA)** is the upstream arm of PT Perusahaan Gas Negara (Persero) Tbk (PGN). PGN Saka works in close cooperation with its parent to acquire, explore and develop natural gas resources and complements PGN's role as the sole gas midstream player in Indonesia. PGN SAKA was established on 27 June 2011.
